RMC Crankshaft Polisher Stands ...

... durable ... versatile ... affordable!

RMC Crankshaft Polishers are not only the best choice for crankshaft polishing, they are ideal for polishing armature cores, shafts, gears, slip rings and many other small parts.

RMC offers several different crankshaft polisher stand sizes and configurations. The **RMC-36CP** model is available with or without the hand-held polisher. The **RMC-60CP** is also available with or without a hand-held polisher, or it can be equipped with a permanently attached polisher and arm.

Whatever your shaft polishing needs, **RMC** has a model designed for a lifetime of superior polishing at a price than you can really afford.

Check out the RMC Advantages!
