RMC-120HDCP

Heavy Duty Crankshaft Polisher

The RMC-120HDCP Built for today's heavy duty applications. This new innovative design offers inverter driven rotation with soft start, air float tail stock for ease of loading and length adjusting and much more.

Dedicated to serving your engine rebuilding equipment needs, since 1957

RMC Crankshaft Polisher Stands ...

... durable ... versatile ... affordable!

RMC Crankshaft Polishers are not only the best choice for crankshaft polishing, they are ideal for polishing shafts, gears, slip rings and many other parts.

RMC offers several different crankshaft polisher stand sizes and configurations. The RMC-120HDCP is equipped with a permanently attached polisher arm.

Whatever your shaft polishing needs, RMC has a model designed for a lifetime of superior polishing at a price than you can really afford.

Check out the RMC Advantages!

Durable welded beam and tube frame
Air float in sliding tail stock with chuck
Linear V-bearing slide attached polisher
10 polishing belts 320 grit

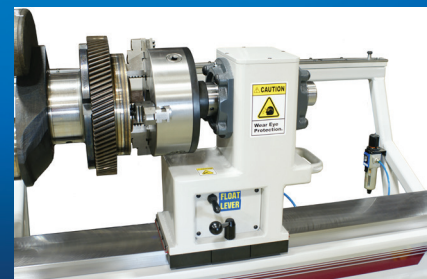

Inverter drive soft start motor
Easy loading 10" reversible 3 jaw chucks
Balanced polishing arm for less operator fatigue

Crank Polishing Belt Replacement sizes:

Polishing belts are available in 80 - 400 grit and 3/4 - 2" widths.

Technical Data	RMC-120HDCP			
Weight capacity	1900 LBS			
Maximum Chuck Capacity	10"			
Minimum Crank Length	60"			
Maximum Crank Length	120"			
Maximum Crank Swing	20.75"			
Belt Length/Width	91"L x 2.5"W			
Electrical Service	VOLTS	PHASE	HZ	AMPS
	220	3	60	15 Standard
	380	3	50	15 (Optional)
	440	3	60	10 (Optional)
Overall length	168.0"			
Overall width	52.5"			
Overall height	79.5" Arm up position			
Shipping dimensions	180"L x 48"W x 80"H			
Gross Weight	2100 lbs/952.54 kg			
Shipping weight	2600 lbs			

Note: Larger capacity and high production polishers are available upon special request. (Please call for a quote.)
