ENGINE REBUILDING EQUIPMENT

Innovation Starts Here!

RMC-OPTS 300

Production Remanufacturing Engine Oil Pump Tester

The RMC OPTS 300 is an accurate and dependable solution to systematically test and identify most common mechanical malfunctions encountered by engine builders, assuring your products will exceed your customers' expectations.

This new innovative design offers complete freedom to customize the operator digital control panel with manual and fully automated testing programs, utilizing the latest electronics, sensors and controls to collect pertinent data for input to the onboard computer and output to the screen, USB or Network locations for analysis or printing.
